TIMETRAX™ SYNC DUAL DIGITAL CLOCK WALL BRACKET
Installation Instructions 42321, 42442

SIMPLE SMART™

OVERVIEW

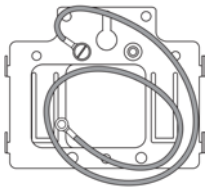
Thank you for choosing a TimeTrax™ Sync Dual Digital Clock Wall Bracket. This bracket kit is used to wall-mount two TimeTrax™ Sync digital clocks back to back, allowing visibility from two directions in a hallway or expansive area. **Use model 42321 with 3x4, 2.5 x 6 or 4x4 digital clock formats. Use model 42442 with 4x6 digital clock formats.**

The anti-theft security brackets (included) provide quick installation to the dual clock wall-mount kit. The dual clock bracket features two wire chases making it easy to run clock and conceal wiring to an electrical work box (bracket mounting plate fits a standard 4in x 4in electrical work box).

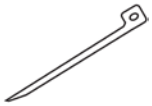
IMPORTANT: WIRING SHOULD BE COMPLETED PER ELECTRICAL CODE AND PERFORMED BY A LICENSED ELECTRICIAN.

For more information, visit pyramidtimesystems.com or call our technical support team at **888.479.7264** during regular business hours: **8am-5pm EST, M-F**.

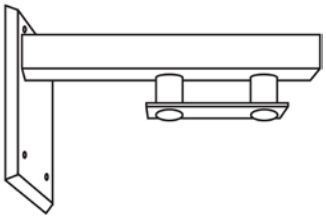
KIT CONTENTS



Dual Security Bracket



Security Bracket Release Key



Dual Clock Wall Bracket

ASSEMBLY/INSTALLATION

1. Place one digital clock face down on flat surface. Position the Dual Clock Wall Bracket so that the flange and wiring chase tubes sit within the corresponding cavity on the back of the clock. If using bracket with LCD battery operated digital clock, skip ahead to step four.
2. Connect green wire from clock to the available grounding screw located on the Dual Security Bracket.
3. Route black and white wires through wire chase tube until they exit the opposite end of the bracket.
4. Tuck all wires inside wire housing cavity on back of clock and connect Dual Security Bracket to clock by aligning four tabs on bracket with the four matching slots on back of clock. Slide the security bracket upward until bracket locks into place.

ASSEMBLY/INSTALLATION (cont.)

5. Connect the green wire from the second clock to the grounding screw on the opposite side of the bracket.
6. Route the black and white wires from the second clock, along with the pre-connected green grounding wire into the remaining wire chase tube until they exit the opposite end of the bracket.
7. Position the clocks back to back while tucking the wires of the second clock into wire housing cavity on back of clock.
8. Align the four slots on back of second clock with the four matching tabs on security bracket. With clocks back to back, push second clock downward onto bracket until it locks into place. Both clocks are now securely attached to the Dual Clock Wall Bracket.
9. Connect the green grounding wire from the clock assembly and the green grounding wire from electrical work box to the grounding screw located on inside of the Dual Wall Bracket mounting plate.
10. Wire nut the black wires from both clocks to the line wire from electrical box. Wire nut the white wires from both clocks to the neutral wire from electrical work box. Tuck all wires into the electrical work box.
11. Attach the clocks and bracket assembly to standard 4in x 4in electrical work box with #6-32 screws (not included).

REMOVING CLOCKS

1. To remove clock or clocks from Dual Wall Bracket, insert provided release key into slot located on top/ back of either clock.
2. Push key all the way into slot. Key will side easily until some resistance from locking tab is felt.
3. With key fully engaged, slide the security bracket up and off of the clock.
